

Set up Firefox for Single Sign On to disable login requirements

1. Open up Firefox
2. In the address bar, type about:config
3. You will get the following warning message box in the middle of the screen

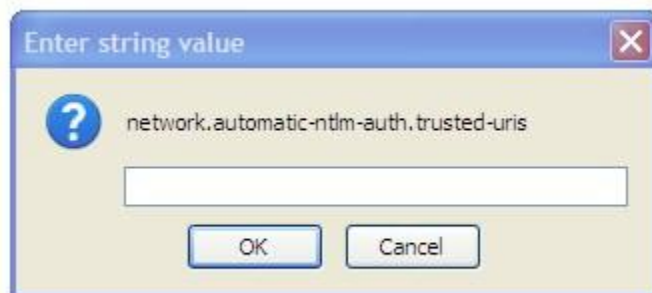

4. Click the "I'll be careful, I promise!" button
5. The following window will come up with the cursor in the Filter box

6. Enter "NTLM" in the filter box and the list will be filtered down to 4 entries

7. Double click on the third one down and an Enter String Value window will open up in the middle

Filter:			
Preference Name	Status	Type	Value
accelerometer.enabled	default	boolean	true
accessibility.accesskeycausesactivation	default	boolean	true
